

STD GAME

Colour Version 3
GimpFM

Players: 2 to 6 Players (4 Players Recommended)

Ages: 16yrs+ (17 or 18yrs Recommended)

About:

The STD game is a simple but fun game in which you catch and have to remove STD's. The game creates awareness about sexual activity and the problems of not using protection.

Aim:

The aim of the game is to remove all of your STDs before you get home. **OR** if you wish to end the game early you can add up the STD ratings and the person with the lowest number wins.

Start:

To determine the number of STD's you start with you roll the dice and the outcome is how many STD's you receive. The person who starts with the most STD's goes first.

Clinic:

When you land on a clinic spot you need to roll a dice and the outcome is how many STD's you can remove. If you land on the 'next clinic closed' square it means the next clinic on the board.

Life & Incident Cards:

You will have to eventually pick one of these up. You have to do as these cards say, then put them on the bottom of the pile. You may have to hold on to the odd card if it says so.

STD Cards:

You **HAVE** to hold on to these cards at all times unless you land on a clinic spot or a Life/Incident card states you can remove any STD's. You may have to print more of these out.

Jail:

You have to get a card to be in jail, if you do land on the space it is a normal square. If you are sent to jail 'you dirty perv' you have to throw a six to get out and every turn you pick up an STD because you are bum raped by Dave the tranny.

School:

If you are on the school square you have to miss a go because you are getting off with the kids or the teachers.

Pub:

When you are on the square you have an option, Pick up three STD's **or** pick up one life card **and** one incident card.

Home:

You need to pass this square without **any** STD's to win otherwise you continue around the board again.

Player Markers:

We have not supplied any player markers with this game so it is up to you to 'borrow' some from other board games i.e. Monopoly. You could just use bits of paper with your initials or other bits of stuff.

Dice:

You will need a 6 sided dice.

Cheating:

Nobody likes a cheat so, if anybody is caught cheating all other players have to spank the cheater and then give him/her/it 1 STD from each other players pile.

STD Lotto:

Everyone puts an STD in to the lotto pile (If a player has no STD's place an STD from the board in their place). Each player rolls the dice until somebody gets a 6, if someone gets a 6 then they win the STD's in the lotto pile.

Life Cards:

Life Card

You got caught with a prozzie go to Jail

RESULT:
Go to jail

Life Card
